

V T series WIDE TEMPERATURE

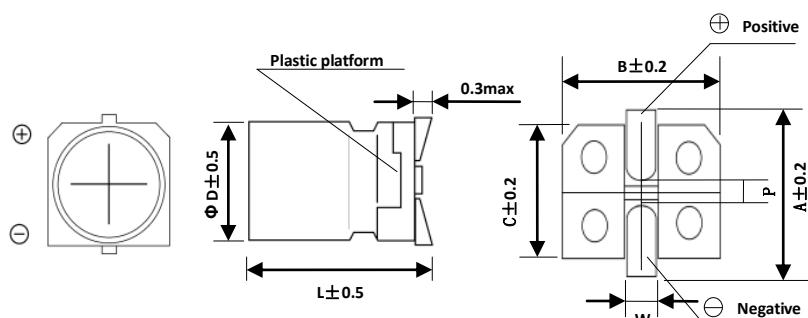

- Operating with wide temperature range -55~105°C
- Load life of 2000 hours
- Comply with the ROHS directive

SPECIFICATIONS

Item	Characteristics																																																																						
Operating Temperature Range	-55~105°C																																																																						
Rated Voltage Range	4~450V																																																																						
Capacitance Range	0.1~6800uF																																																																						
Capacitance Tolerance	±20% at 120Hz,20°C

- Aluminum electrolytic capacitors due to self-heating when the ripple current is superimposed, aging due to temperature rise, the life is reduced by half every 5°C; if you want to maintain a long life, please reduce the ripple current during use.
